A LETTER FROM THE THICK OF THE FIGHT

(Continued from Page Six)

of them carry a joker, like the innocent-looking codicil to a will—which in any case may invalidate the works. Now everything Bill proposes will only be just one more way to chase the same old devil around the same old fake German stump. They are not to be treated with now or ever as responsible Power. For the present, whaling hell out of them, and absolutely designating the switch where they are to head in, is the only thing that will do.

If anyone is drouping in his good resolutions, cite the fact to him that right NOW American boys, who have been unfortunate enough to fall into their hands as prisoners, are being exhibited in German towns as exhibits; handcuffed and lead along like wild animals in a circus, where the populace—the nice, kind-hearted, simple-souled German people—may and do spit upon them, kick them for good measure, just to show that they bear them no animosity. The guards make them eat off dirty dishes, food that is not fit for a dog, though it might be for a beastly boche, and they work our boys until they drop from exhaustion in many cases, make them sleep in places that are so crowded that no-one can sleep, give them in many instances a pint or a quart of water a day for all purposes, BESIDES nameless in-

Range and Market News

Intems of Interest Pertaining to the Livestock Industry of Arizona, Market Letter for the Past Week.

WEEKLY KANSAS CITY STOCK MARKET REPORT

KANSAS CITY STOCK YARDS, Oct. 7th, 1918.—Cattle receipts today were 38,000 head about the same number as last Monday, market steady, top around \$17.50. Hog supply was 16,000, market 10 lower, top \$19.00. Sheep run today was 15,000, market steady, western lambs \$15.65, western ewes \$9.50.

BEEF CATTLE

The steer market today is around 25 cents higher than a week ago. One drove of prime steers brought \$19.00 last week, otherwise few cattle brought more than \$16.50. Scarcely any long fed cattle are in the country at this time, and short fed corn and cake fed steers are selling at \$15.50 to \$17.00. Weighty grass steers, 1100 to 1300 lbs. bring \$13.00 to \$15.00, lighter steers, \$9.50 to \$13.50 though some well bred western steers weighing 950 lbs. are bringing up to \$14.25 under competition from feeder buyers. Colorado beef steers bring \$12.50 to \$14.00, a few head in the last week up to \$15.50. Cows are 25 to 50 higher this week than last, grass cows including Colorados selling at \$8 to \$11.50, canner cows \$5.50 to \$6.50, veal calves cull at \$10 to \$12.50.

STOCKERS AND FEEDERS

Shipments out last week were 37,000 head, and more cattle went to Kansas, Nebraska and Colorado than heretofore. Prices are strong as compared with a week ago, except on plain and common stock steers which are 25 to 50 cents lower than a week ago. Feeders sell at \$9.75 to \$14.25, stockers \$8 to \$12.25, some extra common ones down to \$5.50 and stock calves \$10 to \$10.50.

HOGS

Prices made a net loss of 40 cents last week and there is a decline of 10 cents today, not many good hogs are coming, and the top price today \$19.00 was paid by an order buyer simply because he was afraid to leave the hogs at a lower bid. Packers stopped at \$18.90 today, and best lights \$18.75. Sales ranged on downward to \$17.50 showing a wide variation in degree of finish. Stock pigs are 50 cents to \$1.00 lower than a week ago at \$16 to \$17.50, receipts of this class comparatively large.

SHEEP AND LAMBS

Best western lambs brought \$15.65.

humanities in between, that are local and petty and beyond power of description. If the knowledge of these things does not inspire our people in the United States to become bitter enemies, then they are hopeless and a lead pill for breakfast, before they eat their worthless heads off, will be about the right thing for them.

Moreover, suffer no Hun to get blithe and gay with you over anything! but take a rap at him with anything you can lay hands on. The time is coming, and now is, when the miserable whelps of pro-Huns and spies and propaganda-spreaders at home in America had better begin wearing their helmets, to get in practice, because, if the people do not begin to handle those reptiles in a manner commensurate with their offenses, and do it NOW, be very sure that this ARMY will be perfectly "dee-lighted" to do it plenty when they get back, and do the work on their own time without pay. These are no idle words as you will see later, unless I mistake the cat eating cabbage just now.

When WILL the great American Mutt get wise to the HUN! WHEN? Pope well said that "the proper study for mankind is man." With equal certitude, it can now be said for all the Allied nations that the imperative study for them is the HUN! Knowledge is Power! also Safety. Nothing less will do; so get it now, instead of being sorry lateron.

Oh, well! before the sleepy tousled heads and grafters-at-any-price in America DO wake up to the beastly half devil and half child, and devise the way whatever it may be to head him off and keep him from laying violent, blood-stained paws (I will not call them hands) on America, many thousands of us who voice the warning now will be voiceless and mute forever, so far as this race of men are concerned. But the hope of salvation lies in the millions who will come across after us, and see and know what we realize now, and return to tell our people face to face; then they will believe the well-nigh unbelievable story of the Hun. It will then be written in letters of fire on their memories, and seared by sorrow into the marrow of their souls! Crosses on Flanders fields marking some loved one's grave will serve as constant reminders; and the cripple, hobbling around awaiting the day of the final Reaper, will not allow them to forget what once a drunken Japanese diplomat said of the race of Americans:—"You are the smartest people in the world, but you are too damned slow." I say Amen! And, with it all, I thank God I am an American! Pharisees please take notice.

Wishing you the best of luck, ever your friend,

EARL C. DESMONT.

ELMER WELSH MAKES LARGE SHIPMENT MOHAIR

Elmer Welsh Tuesday last brought in from his ranch on the east side of the Wallapai mountain 5580 pounds of Mohair, which he shipped to the east. Mohair just now is high in price, and as this shipment is of a fine grade it will probably bring a higher price than other grades.

Mr. Welsh has been accumulating a big herd of goats and now has one of the best ranches in northern Arizona.

which shows a big decline from a week ago, native lambs sell at \$13.50 to \$14.50, fat ewes are selling up to \$9.50 today. Other markets have had even heavier declines than Kansas City. Large numbers of good western feeding lambs are being offered every day at lowest prices of the season, namely \$13 to \$14, feeding ewes around \$7.50, breeders \$11.50 to \$17.00.

J. A. RICKART,

Market Correspondent

FOR THE GIRL BACK HOME

In the Paris Foyer des Allies of the Y. W. C. A. a shopping bureau has been organized with a novel purpose. Of course every American soldier has promised the girl back home to send her something from the Paris shops, but when he comes in contact with the jargon of a French shopkeeper he gives up and so the Y. W. C. A. shopping bureau has undertaken the task of shopping for that girl back home for him.

C. B. Craven, wife and a party of friends came down from Chloride last Saturday and viewed the many relics of the Trophy train.

BY THE WAY

From Engineering and Mining Journal

The following extracts from a recent communication is printed as received. We refrain from laying ourselves open to accusation of having attempted "to gild refined gold." We therfor give it as it came:

My dear sir
I noticed your Add in regard you were interested in securing correspondences from one in mining centers, whomight keep you in tutch with the mining activity of The districts of importance, and it is with pleasure to the best of my ability from long years of experience in the mining fields and not haphazard guessing I will hope to give you such information in which you are inereded regarding mining properties of meri and magnaude disclosing the earmarks of probable developing into dividend paying properties, that could be secured and equipped and, purchased on right terms.

Mind you I wish to impress you with the fact I cannot made a producing mine out of gauge material five hundred miles away from any mineral zone, and above all I would be the last man to lead you to error or take up your valuable time in being devoted to a wildcat proposition, or bring you any expensive rain-bow chases.

I have studied this formation from early life in my teen, and their is no reason why I should make any Error's having careful watched all the great mines of this state develop into the greatest dividen payers in the U. S.

In brief, their are a lot of opportunities here to be taken up and if you are interested, I should indeed be pleased to go into further details with you. I will assure you that I will not lead you to any expensive errors, But I

would suggest the best plan would fe to send your engineer here and go over the different properties with me and select what would suite you.

SUBSTITUTE FOR RADIUM FOUND

MILWAUKEE, Wis., Oct. 10th.—A substitute for radium, the world supply of which is only about three ounces of radium element, has been found, according to a statement presented to the American Institute of Mining Engineers here today by Dr. Richard B. Moore of the U. S. Bureau of Mines. The institute

118th meeting here today after taking up a number of important conservation and production measures in connection with minerals of a war-winning character.

Mesothorium is the radium substitute which, according to Dr. Moore, is excellent in many ways. This can be used, it is said, just as efficiently for radium as luminous paint and it is this use to which radium is being especially put in the work on airplane dials, compasses and gun-sights. In these uses it has greatly increased the efficiency of night firing both with machine guns and artillery. The substitute can also be used for cancer treatment, although the fact that it has a shorter life makes it much less desirable for this purpose.

Its usefulness in luminous paint will continue for four or five years, which is as long as is required for cheap watches, push buttons, etc., and which will prevent the use of radium for such purposes, as in some instances it is now being used in wasteful fashion.

The result of Dr. Moore's experiments met with great interest on the part of the mining engineers and excited considerable discussion.

It would suggest the best plan would fe to send your engineer here and go over the different properties with me and select what would suite you.
